ACADEMIC POSITIONS

Postdoctoral Associate, SCALES Program — 2026 –
Duke University, Nicholas School of the Environment

EDUCATION

Ph.D. in Economics — 2026
Georgetown University
Dissertation Title: Essays on the Macroeconomics of Environmental Policies
Committee: Toshihiko Mukoyama (chair), Arik Levinson, Mark Huggett

M.S. in Economics — 2019
Georgetown University
Fields: Macroeconometrics and Financial Economics

B.Sc. in Economics — 2016
Duke University
Certificate in Political Science, Philosophy, and Economics

RESEARCH FIELDS

Primary: Macroeconomics and Environmental Economics

Secondary: Energy Economics, Public Economics

WORKING PAPERS

Equity in Transition: Aggregate and Heterogeneous Effects of Clean Energy Technology Subsidies, *Job Market Paper*

Abstract: I study the distributional and welfare effects of U.S. residential solar subsidies. Although these subsidies appear regressive because higher-income households claim most benefits, I show that accounting for learning-by-doing and unequal pollution exposure reverses this conclusion. I use installation-level data to document learning spillovers and estimate learning elasticities, which discipline a heterogeneous-agent model with incomplete markets and irreversible adoption. Universally accessible subsidies raise welfare and accelerate adoption across financing rules, whereas income-capped subsidies reduce welfare, especially among lower-wealth households. Once pollution damages are included, subsidies become universally welfare-improving and strongly progressive.

Taxing Carbon, Not Competition: Optimizing Market and Environment in a World of Imperfections

Abstract: It is well known that a pollution tax on firms with market power should be below marginal damage. How far below depends on markups and on how much damage a unit of output carries. I measure it for five US carbon-intensive sectors in a dynamic general equilibrium climate model with oligopoly. The optimal tax is 33 to 75 percent of the Pigouvian tax and varies little within a sector, so a sector-wide tax is nearly first-best. Ignoring market power costs 0.11 percent of consumption. Market power lowers these sectors' emissions by about 40 percent relative to perfect competition.

WORKS IN PROGRESS

Critical Minerals, Critical Pressures: Inflationary Dynamics and Monetary Policy in the Clean Energy Transition

When Disaster Strikes Twice: The Macroeconomic Case for Managed Retreat

PROFESSIONAL EXPERIENCE

Georgetown University
Research Assistant
Professor Toshihiko Mukoyama 2021 – 2025
Assistant Professor Margit Reischer 2023
Adjunct Professor Dario Caldara 2019

Federal Reserve Board 2024
Dissertation Fellow in the International Finance Division
Trade and Financial Statistics Section

Milken Institute 2018
Research Intern
Center for Financial Markets

Foundation for Defense of Democracies 2016 – 2017
Research Intern

TEACHING EXPERIENCE

Georgetown University
Instructor
Undergraduate, Economics Math Camp 2023
Ph.D., Economics Math Camp 2021 – 2022
Undergraduate, Principles of Macroeconomics 2021
Graduate Teaching Assistant
Ph.D., Macroeconomics II 2021 – 2024
Undergraduate, Environmental Economics 2022 – 2023
Master in Business, Predictive Analytics 2021 – 2022
Ph.D., Macroeconomics I 2021
Undergraduate, Principles of Macroeconomics 2020

Duke University
Undergraduate Teaching Assistant
Calculus I 2014
Principles of Electrical and Computer Engineering 2013

SKILLS SUMMARY

Programming Languages: MATLAB, Dynare, Python, R, Mathematica
Other Computer Skills: Stata, LaTeX, Microsoft Office Suite
Languages: Turkish (native), English (professional fluency)

HONORS AND AWARDS

SCALES Postdoctoral Fellowship, Duke University	2026 – 2029
Conference Travel Grant Award, Georgetown University	2025
The Maloof Fellowship, Georgetown University	2024
Sixth Year Funding Competition Winner, Georgetown University	2024
Dissertation Fellowship, Federal Reserve Board	2024
CSWEP Summer Dissertation Fellowship, AEA	2024
Summer Dissertation Fellowship, Georgetown University	2022
Graduate Student Teaching Assistant Award Nominee, Georgetown University	2021
Graduate School Fellowship, Georgetown University	2019 – 2024
Dean's List, Duke University	2012

CONFERENCES AND SEMINARS

Allied Social Science Associations (ASSA) Annual Meeting – IAEE Session, Midwest Economic Association (MEA) Meeting – AERE Session	2027
Fundação Getulio Vargas (FGV) EPGE – Rio de Janeiro, University of Stavanger, Resources for the Future, AMMEEGO at Georgetown University, Econometric Society North American Summer Meeting, Midwest Macroeconomics Meeting*	2026
Macroeconomics Seminar at Georgetown University, Georgetown Center for Economic Research (GCER) Alumni Conference, Southeastern Workshop on Energy and Environmental Economics and Policy (SWEEEP) at Georgia Institute of Technology	2025
Federal Reserve Board, Institute for International Economic Studies (IIES) at Stockholm University, Macroeconomics Seminar at Georgetown University, National Academies' Workshop on Macroeconomic Implications of Decarbonization	2024
Annual Macro Meetings at Georgetown University (AMMEEGO)	2023
GCER Alumni Conference	2019

*Upcoming
