ACADEMIC POSITIONS

Postdoctoral Associate, SCALES Program Duke University, Nicholas School of the Environment	2026 –
---	--------

EDUCATION

Ph.D. Candidate, Economics Georgetown University <i>Dissertation Title: Essays on the Macroeconomics of Environmental Policies</i>	2026
M.S. in Economics Georgetown University <i>Fields: Macroeconometrics and Financial Economics</i>	2019
B.Sc. in Economics Duke University <i>Certificate in Political Science, Philosophy, and Economics</i>	2016

RESEARCH FIELDS

Primary: Macroeconomics and Environmental Economics
Secondary: Energy Economics, Public Economics

WORKING PAPERS

Equity in Transition: Aggregate and Heterogeneous Effects of Clean Energy Technology Subsidies

Job Market Paper

Abstract: I study the distributional and welfare effects of U.S. residential solar subsidies. While these subsidies appear regressive because higher-income households claim most benefits, I show that accounting for learning-by-doing and unequal pollution exposure damages reverses this conclusion. Using installation-level data, I document learning spillovers and estimate learning elasticities to discipline a heterogeneous-agent model with incomplete markets and irreversible adoption. The model shows that uniform refundable subsidies financed by a flat labor tax raise welfare and accelerate adoption, whereas progressive financing or nonrefundable credits reduce support among lower-wealth households. When pollution damages are considered, subsidies become universally welfare-improving and strongly progressive.

Taxing Carbon, Not Competition: Optimizing Market and Environment in a World of Imperfections

Abstract: Externalities from carbon emissions and market power work in opposite directions: emissions lead to overproduction, while market power leads to underproduction. Addressing only one failure can worsen outcomes. I develop a dynamic general equilibrium model to derive an optimal output tax formula that depends on firm-level market power and carbon intensity. Calibrated to the top five carbon-intensive US sectors, the optimal tax gets significantly smaller than the tax without considering market power, as competition decreases. In a set of policy experiments, I show that policies designed for incorrect market structures could be more detrimental than not intervening at all.

WORKS IN PROGRESS

Critical Minerals, Critical Pressures: Inflationary Dynamics and Monetary Policy in the Clean Energy Transition

When Disaster Strikes Twice: The Macroeconomic Case for Managed Retreat

From Sectors to Households: Measuring Fiscal Multipliers in the Cross Section

PROFESSIONAL EXPERIENCE

Georgetown University

Research Assistant

Professor Toshihiko Mukoyama 2021 – 2025

Assistant Professor Margit Reischer 2023

Adjunct Professor Dario Caldara 2019

Federal Reserve Board

2024

Dissertation Fellow in the International Finance Division

Trade and Financial Statistics Section

Milken Institute

2018

Research Intern

Center for Financial Markets

Foundation for Defense of Democracies

2016 – 2017

Research Intern

TEACHING EXPERIENCE

Georgetown University

Instructor

Undergraduate, Economics Math Camp 2023

Ph.D., Economics Math Camp 2021 – 2022

Undergraduate, Principles of Macroeconomics 2021

Graduate Teaching Assistant

Ph.D., Macroeconomics II 2021 – 2024

Undergraduate, Environmental Economics 2022 – 2023

Master in Business, Predictive Analytics 2021 – 2022

Ph.D., Macroeconomics I 2021

Undergraduate, Principles of Macroeconomics 2020

Duke University

Undergraduate Teaching Assistant

Calculus II

2014

Principles of Electrical and Computer Engineering

2013

SKILLS SUMMARY

Programming Languages: MATLAB, Python, R, Mathematica

Other Computer Skills: Stata, L^AT_EX, Microsoft Office Suite

Languages: Turkish (native), English (professional fluency, C1), French (beginner, A1)

HONORS AND AWARDS

Conference Travel Grant Award, Georgetown University 2025

The Maloof Fellowship, Georgetown University 2024

Sixth Year Funding Competition Winner, Georgetown University 2024

Dissertation Fellowship, Federal Reserve Board 2024

CSWEP Summer Dissertation Fellowship, AEA 2024

Summer Dissertation Fellowship, Georgetown University 2022

Graduate Student Teaching Assistant Award Nominee, Georgetown University 2021

Graduate School Fellowship, Georgetown University 2019 – 2024

Dean's List, Duke University 2012

CONFERENCES AND SEMINARS

Fundação Getulio Vargas (FGV) EPGE – Rio de Janeiro, University of Stavanger, Resources for the Future, AMMEEGO at Georgetown University, Econometric Society – North American Summer Meeting 2026

Macroeconomics Seminar at Georgetown University, Georgetown Center for Economic Research (GCER) Alumni Conference, Southeastern Workshop on Energy and Environmental Economics and Policy (SWEEEP) at Georgia Institute of Technology 2025

Federal Reserve Board, Institute for International Economic Studies (IIES) at Stockholm University, Macroeconomics Seminar at Georgetown University, National Academies' Workshop on Macroeconomic Implications of Decarbonization 2024

Annual Macro Meetings at Georgetown University (AMMEEGO) 2023

GCER Alumni Conference 2019
